Another mixin library?

Why build your own *
library/framework?**

- Total **control** over your code;
- Code **quality**;
- Do what you **want**;

With that in **mind**...

mussarela

*An **useful** and **simple** set of SASS mixins!*

What's a mixins?

Is like a function

```
1 @mixin size($height, $width) {  
2   height: $height;  
3   width: $width;  
4 }
```

You can define default params

```
1 @mixin size($height: auto, $width: 100%) {  
2   height: $height;  
3   width: $width;  
4 }
```

Addons

Mixins

Functions

Settings

Media

Settings

- Base font
- Breakpoint
- Interval Unit

Addons

- Pixels to ems
- Pixels to rem
- Tint e Shade
- Text inputs
- Timing functions

Mixins

- Border radius
- Clearfix
- Coverer
- Horizontal center
- Placeholder

- Triangle
- Truncate
- Vertial center
- Position
- Selection

Media

An awesome mixin to deal with
media queries

To do...

- Add tests – doing
- Create a CLI tool with Nodejs – doing
- Put in a GEM – hihi

News features coming

- Events mixin
- Fonts mixin
- Vertical rhythm

Thanks

mussarela
